# Extending the national gas regulatory framework to hydrogen blends & renewable gases

# -AEMO Review

23 September 2021

AEMO
AUSTRALIAN ENERGY MARKET OPERATOR

# Tasking overview

- AEMO has been tasked by energy ministers to review the NGR (where appropriate), Procedures and subordinate instruments to identify any changes that may be required to facilitate low-level hydrogen blends.
  - Part of a broader piece of work to review the regulatory framework involving jurisdictions and market bodies.
- Scope of our task:
  - Review our STTM, DWGM and retail market procedures[1].
  - Ensure that settlement and metering in the markets operate as intended.
  - Address any other material gaps that may emerge in these markets.
- Key deliverables:
  - Consultation papers[2] - end of October 2021
  - Draft AEMO Procedures – March 2022
  - Final draft AEMO Procedures – by September 2022
  - Implement any changes after NGR and NGL changes have been made
- AEMO will consult on any Procedure changes via the consultative forums.

Note 1 – Excludes Western Australian Retail Market Procedures.

Note 2 – From Jurisdictions, AEMC and AEMO
