1 Executive Summary

The power system is operated such that the loss of single elements in the transmission network such as circuits or transformers or the loss of single generating units (known as “credible contingency events”) can be accommodated without causing further problems and thus avoiding a cascade failure. This is known as a “secure operating state”.

It cannot be guaranteed that at all times the power system will withstand the simultaneous loss of multiple transmission elements or generating units or loss of more secure elements such as busbars (known as “non-credible contingency events”).

However under abnormal conditions where the likelihood of multiple failures is increased then AEMO will temporarily adjust the operation of the power system so that it can withstand the loss of certain multiple elements which are at that time under a known threat. This process is termed “reclassification of a contingency event”. Abnormal conditions are conditions posing added risks to the power system, including without limitation, severe weather conditions, lightning, storms and bushfires.

Examples of such reclassifications might be a reclassification of the loss of both circuits of a double transmission line in the presence of lightning or loss of two transmission circuits in a common easement under threat from bushfires.

Rule 4.2.3B was introduced into the National Electricity Rules on the 23 October 2008 to ensure that such reclassification processes are undertaken in a methodical and organised manner.

This Rule requires AEMO to establish criteria that it must use when considering whether the existence of *abnormal conditions* makes the occurrence of a *non-credible contingency event* reasonably possible under NER clause 4.2.3A (e).

The decision making processes have been designed with a view to providing effective actions on a practical basis. This improves the efficiency of criteria assessment and decision delivery. For instance, to be effective any decision making process regarding reclassification needs to be capable of being made within about 15 minutes of the receipt and assessment of information.

National Electricity Rule 4.2.3 A (i) requires AEMO to issue a report at intervals of six months setting out the reasons for all decisions to reclassify *non-credible contingency events* to *be credible contingency events* under clause 4.2.3A (g) during the relevant period.

The report:

1. must include an explanation of how AEMO applied the criteria established in accordance with 4.2.3B for each of those decisions; and
2. may also include AEMO’s analysis of re-classification trends during the relevant period and its appraisal of the appropriateness and effectiveness of the relevant criteria that were applied in the case of each reclassification decision.

This report provides compliance with the above rule requirements.

3 Definitions

GPATS: Global Positioning and Tracking System. This is a Lightning Detection System used by AEMO Operations.

INDJI: (Indji Watch): used by AEMO Operations : is an internet based system that monitors live information feeds on hazards such as bushfires and compares them with locations of transmission assets.

4 Development of Criteria for Re-classifying Contingency Events

AEMO has established three categories of criteria required for the assessment of whether a *non-credible contingency event* is reclassified as a *credible contingency event*. They are

1. **Bushfires**
2. **Lightning** and,
3. **Other** - comprises of but not limited to;
 - the threat of disconnection of multiple generating units,
 - the impact of pollution on transmission insulators,
 - the impact of protection or control systems malfunction on plant or
 - extreme weather conditions.

Following consultation with the relevant stakeholders, the criteria for assessing reclassifications is published in the AEMO Operating Procedure Power System Security Guidelines SO_OP3715, located on the AEMO website at <http://www.aemo.com.au/electricityops/3715.html>.

5 Analysis of Reclassification Events over the Reporting Period

A total of 284 reclassification events occurred over the reporting period 1 November 2012 to 30 April 2013.

In the period there were 32 non-credible contingencies events. None of these were reclassified prior to the event. Seven of these though led to reclassification (highlighted in red in Table 5) post event.

5.1 Bushfires

Reclassifications for bushfires during the period were performed on the basis of established criteria as specified in SO_OP3715. There were 13 reclassifications due to bushfires in the reporting period.

5.2 Lightning

Reclassifications for lightning during the period were performed on the basis of established criteria. Table 6 in Appendix A lists out the vulnerable transmission lines which are eligible to be reclassified as a credible contingency event during a lightning storm if lightning activity is detected in the vicinity of the lines.

Information from the AEMO GPATS was utilised in the assessment process.

For lightning a total of 260 reclassification events occurred over this reporting period an increase of 181, compared to 79 events in the previous reporting period.

5.3 Other

Under the “Other” category eleven reclassification events occurred over the reporting period. These events were reclassified on the basis of participant information. Five of these resulted from actual multiple contingent events, and are highlighted in red in Table 4.

5.4 Reclassification Events that had a market impact

For the reporting period there were 25 occurrences of reclassification where the corresponding constraint bound. Further details of these events are provided in Table 1.

Table 1 Reclassification events where constraints bound.

6 Analysis Summary

AEMO has analysed the re-classification trends during the relevant reporting period and has assessed the appropriateness and effectiveness of the relevant criteria that were applied in the case of each re-classification decisions and has deemed they are appropriate.

Analysis of the reclassifications occurring over the reporting period 1 November 2012 to 30 April 2013 is summarised in the Table 2. Although the actual incidence of the event occurring is very low, generally the incidence of a normal credible contingency is also very low under similar conditions.

For the reporting period there were no occurrences where the reclassification event was actually realised.

Table 2 Statistics for reclassifications over the reporting period 1 November 2012 to 30 April 2013.

Category	Number Reclass Events	Actual Incidence of Event Occurring during reclassification
Bushfires	13	0
Lightning	260	0
Other	11	0
Total for Period	284	0

Figure 1 shows the number of reclassification events per region over the reporting period 1 November 2012 to 30 April 2013.

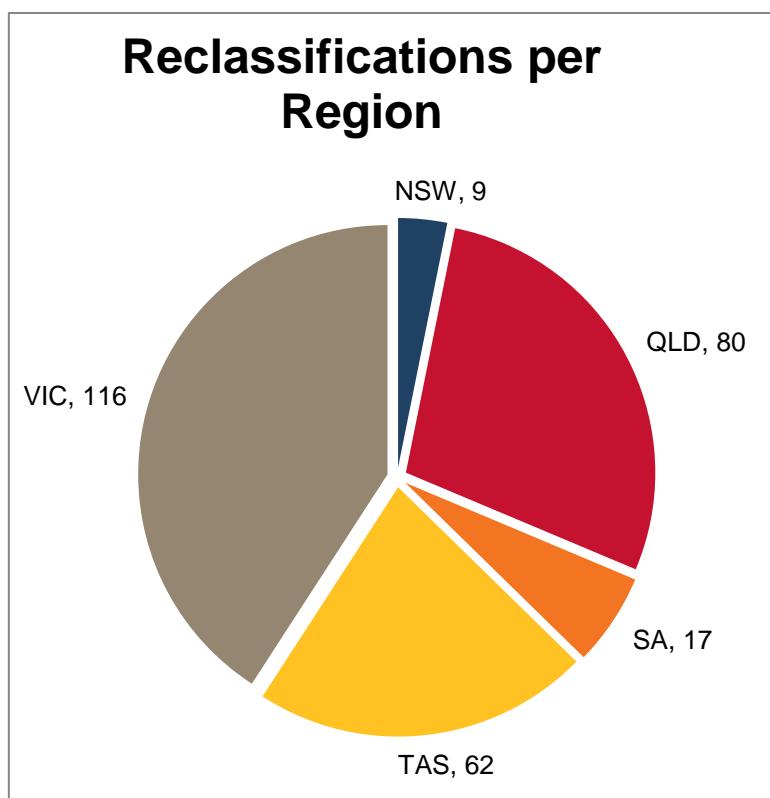

Figure 1 Reclassifications per region

Table 3 and Figure 2 below show the historical statistics for reclassification events that occurred since October 2008.

Table 5 Actual simultaneous trips (Non-credible contingencies) from 1 November 2012 to 30 April 2013

Incident Data and Time	Market Notice	Title	Region	Reason	Additional Information
12/11/2012 11:05	40252	Farrell - Sheffield no.1 and no.2 220 kV lines	TAS	Lightning	
14/11/2012 07:20	40269	Loss of Multiple generators at YWPS	VIC	Other	At 0717 hrs Yallourn W1 and W3 Generators tripped for a total loss of approx 753 MW.
14/11/2012 12:00	40275	loss of H_10 Bouldercombe No 2 275 kV Bus	QLD	Lightning	The H10 Bouldercombe No.2 275kV Bus tripped resulting in the offloading of H10_Bouldercombe to H29_Stanwell (849) 275kV Line.
27/11/2012 03:15	40407	Berri No. 1 66kV bus and trip of MurrayLink	NSW	Other	At 0312 hrs the following transmission elements tripped.Berri No. 1 66kV bus and Murraylink tripped and
27/11/2012 04:45	40410	Trip of ROTs - YPS Nos. 5 and 6 220kV Lines	VIC	Lightning	Trip of ROTs - YPS 5 and 6 220kV Lines. ROTs_RTS No 4 220kv Line offloaded at ROTs
27/11/2012 07:30	40416	George Town 220kV B Bus trip	TAS	Other	
30/11/2012 20:40	40462	Liapootah Waddamana (tee) Palmerston No.1 and No.2 220 kV transmission lines	TAS	Bushfires	
08/12/2012 19:45	40592	FA-SH 1&2 and Rio Tinto load trip	TAS	Lightning	At 1942 hrs 8 December 2012 the Farrell - Sheffield No.1 & No.2 220 kV transmission lines in Tasmania tripped simultaneously.
10/12/2012 10:00	40625	Sydney West B1 330 kV bus tripped.	NSW	Other	This offloaded the following transmission lines. Constraint set N-LPSW30+RGSW38 invoked
12/12/2012 05:25	40646	Torrens Island B PS West 275kV Bus and TIPS B3 Generator trip	SA	Other	At TIPS slow opening of CB BW3 after generator trip backed up into bus protection. Not reclassified.
08/01/2013 09:10	40964	H18 Tarong No 2 275kV Bus	QLD	Other	Personnel working on CB 88122. Powerlink investigated the bus zone protection
08/01/2013 13:50	40967	Canberra to Capital 6 330kV line and Capital to Kangaroo Valley 3W 330kV lines	NSW	Other	Bushfire under 3W possible protection or CB mal-operation
18/01/2013 00:40	41133	22 kV feeder D252 Ex Scottsdale 110 kV Substation and the TEMCO load	TAS	Other	Events determined to be unrelated. Possum tripped Temco potlines.
25/01/2013 13:25	41236	Sydney South - Wallerawang (76) 330kV line, Ingleburn - Wallerawang (77) 330kV line, Wallerawang generator no.8	NSW	Bushfires	
26/01/2013 08:15	41247	876 Gladstone - Calliope River 275kV line and Gladstone Generator No.1	QLD	Other	
27/01/2013 19:55	41266	Multiple generator units at Gladstone power station tripped	QLD	Other	Units tripped due to low fuel oil
02/02/2013 12:00	41348	Farrell B 220kV bus trip	TAS	Other	CB fail operation on Bastyan 220kV CB
13/02/2013 05:05	41449	Darling Downs power station	QLD	Other	Controls problem being investigated
14/02/2013 13:10	41507	Simultaneous trip of 97G & Murray Tie transformer	NSW	Lightning	97G was offloaded at the time of the incident - TG investigating.
15/02/2013 19:40	41527	Parafield Gardens West 66kV bus	SA	Lightning	20MW load loss
15/02/2013 20:40	41528	Hummocks Waterloo and Hummocks Kadina East 132kV lines	SA	Lightning	loss of 14MW
		The Northern power station no.2 generator (230MW), the Davenport-Northern power station no.2 275kV line and the Northern power station no.1 generator (240MW)	SA		waiting
26/02/2013 04:25	41647	876 and 877 Chalumbin Woree 275kV lines tripped simultaneously due to lightning	SA	Climatic	
02/03/2013 18:30	41706	876 and 877 Chalumbin Woree 275kV lines tripped simultaneously due to lightning	QLD	Lightning	MN 41707 issued advising of changed category possible to probable for 876 and 877 Chalumbin Woree 275kV lines

Incident Data and Time	Market Notice	Title	Region	Reason	Additional Information
09/03/2013 22:10	41808	Millmerran power station No.1 and No.2 generators tripped simultaneously.	QLD	Other	Refer SMIRK report
21/03/2013 09:20	41956	At 0918 hrs the Tarong- Blackwall 875 275 kV line and the Tarong -Blackwall 827 275kV lines tripped and auto reclosed.	QLD	Other	Powerlink isolated faulty current differential line protection.
21/03/2013 18:35	41975	Farrell - Sheffield no.1 and no.2 220 kV lines and 130 MW of Rio Tinto load	TAS	Other	Lines were reclassed for lightning
21/03/2013 19:00	41978	George Town - Sheffield no.2 220 kV line and 100 MW of Rio Tinto load	TAS	Other	.
21/03/2013 19:05	41992	Burnie - Sheffield no.2 110 kV line and the Palooma - Sheffield 110kV line	TAS	Lightning	,
21/03/2013 20:55	41981	George Town - Sheffield no.2 220 kV line and 225 MW of Rio Tinto load	TAS	Other	.
21/04/2013 11:50	42198	Chalumbin No1 Transformer 7192 Kareeya and 7166/1 Turkinje 132kV lines	QLD	Climatic	Loss 40MW load Turkinje and Craigie and 18MW generation Kareeya unit 2
24/04/2013 00:55	42210	Simultaneous trip of Chalumbin-Turkinje 7165/7166 132kV Lines	QLD	Other	Event time 0056 hrs Wed 24/04/13. Cause not specified. Load loss 35MW.
29/04/2013 21:25	42257	H18 Tarong No. 2 275kV Bus tripped	QLD	Other	Non-Credible Contingency Event Queensland. protection issues

8 Appendix A: Vulnerable Transmission Lines

A double circuit transmission line in this category is eligible to be reclassified as a credible contingency event during a lightning storm if a cloud to ground lightning strike is detected within a specified distance of the vulnerable lines.

Note: Table 6 below is obtained from Power System Security Guidelines SO_OP3715 Version 53 dated 3 May 2013.

Table 6 Vulnerable transmission Lines

Region	Double Circuit Transmission Lines	LTTW End Date Probable	LTTW End Date Proven	Reason for Classification	Category (Probable or Proven)
Queensland	T37 Collinville – T39 Mackay tee T38 Proserpine No.7125 and No.7126 132 kV Lines	22/03/2016	29/12/2015	Tripped twice in past 5 years	Proven
Tasmania	Chapel St – Liapootah No.1 & No.2 220 kV lines	N/A	25/01/2020	No Shielding	Proven
Tasmania	George Town – Hadspen No 1 & No.2 220 kV lines	N/A	25/01/2020	No Shielding	Proven
Tasmania	George Town – Sheffield No.1 & No.2 220 kV lines	N/A	25/01/2020	No Shielding	Proven
Tasmania	Hadspen – Palmerston No.1 & No.2 220 kV lines	N/A	25/01/2020	No Shielding	Proven
Tasmania	Liapootah – Palmerston No.1 & No.2 220 kV lines	N/A	25/01/2020	No Shielding	Proven
Tasmania	Farrell – Reece No.1 & No.2 220 kV lines	08/08/2017	N/A	Tripped once in past 5 years	Probable
Tasmania	Farrell-Sheffield No.1 & No.2 220 kV lines	08/12/2017	12/11/2017	Tripped twice in past 5 years	Proven
Tasmania	Burnie - Sheffield No.2 110 kV line and Palloona - Sheffield 110kV line	21/03/2018	N/A	Tripped once in past 5 years	Probable
Victoria	Dederang – Glenrowan No.1 and No.3 220 kV lines	13/11/2015	03/04/2014	Tripped more than once in past 5 years	Proven
Victoria	Eildon PS – Mt Beauty No. 1 & No. 2 220 kV lines	09/02/2015	22/01/2014	Tripped more than once in the past 5 years	Proven
Victoria	Hazelwood – Rowville No.1 & No.2 220 kV lines	27/02/2015	N/A	Tripped once in past 5 years	Probable
Victoria	Rowville – Yallourn No.5 & No.6 220 kV lines	27/11/2017	N/A	Tripped once in past 5 years	Probable
Queensland	Chalumbin – Woree No.876 and No.877 275 kV lines	02/03/2018	N/A	Tripped once in past 5 years	Probable
Queensland	Moranbah Goonyella2 No.7369 and No.7370 132 kV lines	28/01/2017	N/A	Tripped once in past 5 years	Probable
Queensland	No.7117 Kemmis-Moranbah tee Burton Downs and No.7118 Nebo-Moranbah tee Coppabella 132 kV lines	22/02/2017	N/A	Tripped once in past 5 years	Probable

² Due to augmentation works relating to No.7122 and No.7155 132 kV lines the previous reclassification of these lines as vulnerable is now applicable to No.7369 and No.7370 132 kV lines respectively between Moranbah and Goonyella. The original No.7122 is now between T212 (Goonyella) and T178 (Stony Creek) with a tee to T137 (Nth Goonyella) and No.7155 is now between T212 and T069 (Newlands). No.7369 and No.7370 contains the sections of No.7122 and No.7155 that initiated the original reclassification
