

AEMO IT Changes – Forward Schedule of Changes published on 24th April 2018

Number	Short description	Configuration item	▲ Environment	Planned start	Planned end	Outage start	Outage end	Impact/User Requirements
CHG0048443	EMMS Preproduction - Participant File Server move to new Disk Storage		Pre-Production	25/04/2018 09:00:00	30/04/2018 17:00:00			This activity will only affect the EMMS Pre-Production environment and we expect that periods of downtime will be minimal to none. Therefore participants will be able to use Pre-Production as per normal throughout.
CHG0048449	MSATS Preproduction - Participant File Server move to new Disk Storage		Pre-Production	25/04/2018 09:00:00	30/04/2018 17:00:00			This activity will only affect the MSATS Pre-Production environment and we expect that periods of downtime will be minimal to none. Therefore participants will be able to use Pre-Production as per normal throughout.
CHG0047948	***PROJECT- MarketNet load- balancer replacement*** - Cutover to new F5 load-balancer in Norwest	NorNMNetF5-Pri	Production	08/05/2018 09:00:00	09/05/2018 14:00:00	08/05/2018 11:00:00	08/05/2018 11:05:00	During the time of change, MarketNet participants will be impacted if they're using the NSW gateway (202.44.78.10) as their primary connection. Please ensure all your L2L VPN traffic is utilising the QLD gateway 202.44.76.10 as your primary connection to ensure you will not be disrupted by this change. MarketNet IPWAN services will automatically prefer the QLD gateway.
CHG0048296	Telco Outage Notification - NSW Datacenter Optus Internet Service - CHG0271594	Internet	Production	26/04/2018 02:00:00	26/04/2018 06:00:00	26/04/2018 02:00:00	26/04/2018 06:00:00	The following impacts are expected to participant connectivity during this planned outage: IPWAN Participants - Nil Lan-2-Lan VPN Participants - Upto 1 x 20 minutes to participants whom have established their VPN connection/s via the AEMO NSW datacenter termination point (202.44.78.10) Note: Participants are encouraged to ensure their VPN connections are already established or are configured (as per AEMO best practice) to automatically failover to the alternate AEMO QLD datacenter termination point (202.44.76.10) prior to this scheduled outage. Remote Access VPN Participants: Upto 1 x 20 minutes to participants who utilise an AEMO RSA token and the AEMO VPN client software to establish their VPN via the AEMO NSW datacenter VPN termination point (202.44.78.8) Note: Participants are encouraged to establish their VPN client software connections via the alternate AEMO

								<p>QLD datacenter VPN endpoint (202.44.76.8) prior to this scheduled outage.</p> <p>SSL VPN Participants: SSLVPN users may experience an outage as services are moved to the alternate AEMO VPN access point.</p>
CHG0048410	Planned System Outage - Gas Supply Hub Production Site Transfer from Brisbane to Norwest	Production	24/04/2018 19:00:00	24/04/2018 23:00:00	24/04/2018 19:00:00	24/04/2018 20:00:00		<p>All access to the Gas Supply Hub (Exchange Trading System) will be unavailable during the outage period. Please access outside this outage period.</p>
