1. Introduction

These are the release notes for WEMS 3.11 Patch 3 (Build 3.11-374-116).

The Minister for Energy rejected RC_2013_10 (Harmonisation of Supply-Side and Demand-Side Capacity Resources) on 21 May 2014. This release reverses the changes introduced for the 2014 Reserve Capacity Certification process as required by rule change RC_2013_10. Further, due to the deferral of the 2014 Reserve Capacity Cycle to 1 May 2015, this release is required to ensure that certification process for the 2014 Reserve Capacity Cycle is compliant with the Market Rules.

For further information in relation to RC_2013_10, please visit:

http://www.imowa.com.au/home/electricity/rules/rule-changes/rejected/rule-change-rc_2013_10

2. New features

No new features have been included in this release.

3. Resolved issues

Ref.	Description	Comment	Rating
WEMS-5800	Changes to the Reserve Capacity Certification submission formats and parameters have been reversed to ensure the process is compliant with the market rules.	This change will ensure that the certification process and submission formats remain unchanged from previous Reserve Capacity Cycles.	High
WEMS-5809	New validation added to Reserve Capacity Certification CSV submission for DSPs. The validation ensures data integrity in the additional block CSV with the main DSP main file.	<i>Error Code:</i> 5809 <i>Error Message:</i> The capacity block for facility {0} in Additional Block CSV does not have record in Main CSV file	Medium

Status Key

	Internal changes
	Minimal or no impact to Market Participants
	Needs attention. Potentially requires system or operational procedure changes
