

The following table provides the information on the operation of the Swing Service market on the North Metro and South Metro sub-networks over a 13 month rolling window.

Month	Metro-South Sub-Network		Metro-North Sub-Network	
	Peak SS South-Metro	Average SS South-Metro	Peak SS North-Metro	Average SS North-Metro
March 2022	704	26	932	113
April 2022	82	16	340	31
May 2022	11	5	661	52
June 2022	352	20	354	39
July 2022	1,413	113	37	4
August 2022	12	8	104	37
September 2022	11	9	200	20
October 2022	7,001	242	5,490	298
November 2022	329	17	160	9
December 2022	683	59	169	12
January 2023	1,495	143	1,712	92
February 2023	1,220	100	386	82
March 2023	724	58	1,497	167
<b>Average</b>	<b>2-year</b>	<b>61</b>	<b>2-year</b>	<b>52</b>

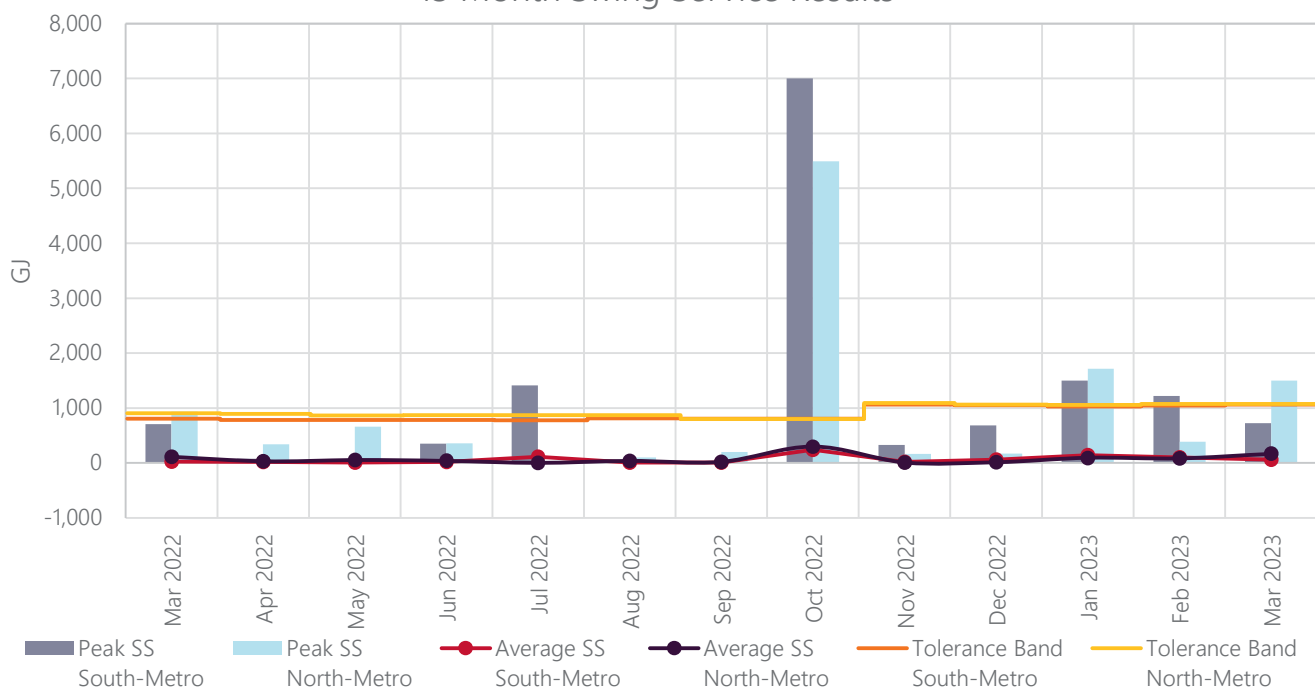

### North Metro

Average and peak swing service volumes in the North Metro sub-network were at relatively low levels for the month of March 2023, with the exception of spikes on gas days 8, 10 and 31 March. The high swing service volumes on gas days 8 and 10 March were due to pipeline injection being less than the user pipeline nominated amount (UPNA). APA experienced higher pressure affecting their ability to inject gas into the sub-network. The high swing service volume on gas day 31 March was investigated and found to be due to a metering error.

### South Metro

Average and peak swing service volumes in the South Metro sub-network were at relatively low levels for the month of March 2023, with the exception of a moderate spike on gas day 8 March.

### 13 Month Swing Service Results

### Daily Swing Service Volumes for a Two Month Period

Terms:

- Peak SS means the maximum amount of Swing Service recorded on a day during that month.
- Average SS means the average amount of Swing Service for any day in that month.
- Peak Trend is the linear trend of the Peak SS data, using the least squares method.
- Average Trend is the linear trend of the Average SS data, using the least squares method.
- Tolerance Band is a marker – AEMO will investigate and report on any Swing Service spikes that are larger than the Tolerance Band. The Tolerance Band is defined as a volume equal to the mean amount of Swing Service over the last 2 years plus 3 standard deviations.
