4. Proposed Amendments

The Amendments to the CATS Procedure and the WIGS Procedure as follows.

- Correct template

The CATS Procedure should be amended to correct:

- missing paragraph resets and font issues
- wrong font and wrong paragraph settings in Table 4-D.
- a stray bullet point under NREG.

- Incorporate NCONUML

A stakeholder has indicated that the application of the CATS Procedure is not sufficiently clear in section 4.5. Section 4.5 references “LARGE” and “SMALL”. However, NCONUML is also used in the CATS Procedure. Accordingly, section 4.5 should be amended to incorporate NCONUML.

- Align references

The CATS Procedure should be amended to reflect the role of an Integrated Resource Provider (**IRP**) that is a Small Resource Aggregator in respect of a small resource connection point, under the IESS Rule.

- Amend footnote

A footnote in section 6.2 of the CATS Procedure should be amended to include TIRS, DIRS and DGENRATR.

- Add NMI Classification Code

AEMO will use the Bulk Change Tool (**BCT**) to transition distribution-connected generating systems from GENERATR to DGENRATR to implement the IESS Rule. However, the sections in the CATS Procedure and the WIGS Procedure that list the Standing Data items that can be updated using the BCT should be updated to include NMI Classification Codes.
