1. Please provide your views on the Procedure Change Proposal, including any objections or suggested revisions:

LGP supports the procedure Change Proposal on the grounds that inclusion of additional data for solar and wind facilities will help improve System Management's forecasts of System Load.

2. Please provide an assessment whether the Procedure Change Proposal is consistent with the Market Objectives and the Wholesale Electricity Market Amending Rules.

LGP considers that the Amended enhances Market Objectives (a) [economically efficient, safe and reliable production and supply of electricity...] and (d) [minimise the long-term cost of electricity...] because it will improve the dispatch of Scheduled Generators and alleviate the disconnect between the STEM and MCAP prices that has manifested over the last few months.

3. Please indicate if the Procedure Change Proposal will have any implications for your organisation (for example changes to your IT or business systems) and any costs involved in implementing these changes.

The procedure change will not impact adversely on LGP.

4. Please indicate the time required for your organisation to implement the changes, should they be accepted as proposed.

LGP could implement the changes immediately.
