Dear Terry

RE: Registration of 26w LED retrofit kit to suit Westside Flinders lantern on AEMO National Electricity Market Load Tables

The Mount Barker District Council is intending to install LED lighting along a section of Mount Barker Rd.(Main St.) of Hahndorf as part of a sustainable streetscape project. There is a wider interest in the community in supporting the use of LED lighting to maximise lighting efficiency and reduce energy consumption along with greenhouse emissions.

We respectfully request that you undertake the necessary steps to enable the above LED light to be added to the AEMO load tables.

Can you please advise me when the luminaires have been included and published in the AEMO tables.

Please contact myself if you require further information to support this request.

Yours sincerely

Wayne Dunningham
