Re: Submission to include WE-EF Lighting ZFT444 LED Luminaires into the National Electricity Market Load Table

Dear David,

At the request of the City of Adelaide, we would like to have the WE-EF luminaire ZFT444 9 LED 18W/700mA Series, Total Power Consumption 21.2W, included in the National Electricity Market Load Table.

Included for our submission are documents as follows:

- Letter of Support from the City of Adelaide
- TUV Rheinland test report 50340052 001 for the wattage of the luminaire
- Data Sheet for the product family

The tested ZFT444 led luminaire family is specifically designed for use in both Australia and New Zealand markets for minor road applications. This is a high-performance luminaire designed to comply to all standards and specifications as outlined in AS/NZ 1158.6. All marking and labelling is as per AS/NZS 1158 including internal labels.

We trust the submission meets your approval requirements. However, should there be any queries or if you require any further information, please do not hesitate to contact me.

Kind regards,

Stefan Kissner
Technical Manager
