Re: Empyrean 30W Andromeda-C-PoleMS LED luminaires

Noosa Council is progressively replacing our existing lighting of various types and wattages with suitable LED replacements and has used and plans to use the 30W Andromeda-C-PoleMS LED luminaires where appropriate for future lighting renewals. Noosa Council is committed to sustainable and energy efficient lighting and supports Empyrean's initiative to seek approval of the 30W Andromeda-C-PoleMS LED luminaires.

The significant reduction in power consumption will support Council's drive to replace inefficient lighting with energy efficient lighting that will substantially reduce electricity consumption and greenhouse gas emissions, helping Noosa Council to achieve its zero net emissions target by 2026.

Should you have any questions or wish to discuss this matter further, please feel free to contact me.

Yours sincerely

Siew Neale
