Dear David,

Re: Application for inclusion of Connected Light Solution GE 80W LED Lamp

Essential Energy supports and intends to use the following GE 80W LED Lamp from Connected Light Solutions and ask for it to be included on the AEMO as unmetered Connection Points in accordance with the unmetered guideline.

Essential Energy understands and accepts that the existing MV ballast needs to be removed or bypassed to achieve the GE LED 80W lamp's correct load consumption.

Device Type: GE LED 80W HID LAMP E40 4000K
Model #: S93105826

Regards,

Adele Finch
