Subject: Application to include 1 x Philips Roadfair Street Light onto AEMO Load Table

Dear David,

Signify Australia Ltd has been invited to seek inclusion of the following LED Flood Lights in the NEM load table by Energy Queensland, per the attached letter.

The following fittings are being put forward for inclusion:

Description	Average Tested Wattage
BRP394 LED324/WW 225W DWV PSD P7	226.08W

The following documents have been included in this submission:

- Supporting document from Energy Queensland – requesting inclusion onto AEMO load table
- LCP Report for BRP394 LED324/WW 225W DWV PSD P7: 230112LCP
- Datasheet for Roadflair Street Lights

The luminaires were tested using a NEMA base shorting cap, and the PE Cell load was not included in the Test Reports.

Each luminaire will have marking complying with TS 1158.6. This will be achieved by placing a label with indelible ink on an area of the luminaire that is visible when the luminaire is installed.

I appreciate your assistance with this application for inclusion onto the AEMO Load table.

Kind Regards,

A handwritten signature in black ink, appearing to read 'J. Lipiec'.
