Dear Keith,

Subject: Use of FL820 floodlights on unmetered loads within the Ausgrid operational region

Ausgrid as the Lighting Service Network Provider intends installing CU Phosco FL820 floodlights on the unmetered network within our area of operation and controlling this lighting using a Central Management System to provide monitoring, control and enable reductions in energy and greenhouse emissions.

To enable these initiatives to benefit Ausgrid and its customers it will be necessary to include them within the AEMO Load Tables.

Therefore, Ausgrid supports your submission to include these floodlights in the Load Table. Please advise when they have been published.

Yours sincerely
