AEMO Gas Retail Report Vic - Distributor Performance ending 14 Apr 2024

Prospective Transfers - 4 Week Average Percentage Read Failures

(The read failure statistics are generated from the data available at the time of report generation, which may be impacted by performance issues. Read failures can be a reflection of all participants' performance with transfers and of AEMO's Gas FRC Hub performance. A key reason for the difference between distributors is related to meter access which is more problematic in high density housing and inner city areas.)
