GSI	Gas Services Information

# 2. Resolved Issues

Table 3 Resolved issues

Reference	Summary	Resolution
● GISP-1152	GBB(WA) Website was granting public access to the API that returned submission obligation reports. Data could be returned using a set of specific API URL's.	AEMO has implemented an additional authorization requirement to limit the display of submission obligation reports to administrative users in the GBB(WA).
● GISP-1156	AEMO has implemented additional monitoring for Large User Facilities that have applied for registration exemption under GSI Rule 47. This applies to facilities that consume under 10TJ/day but have a capacity greater than 10TJ/day.	AEMO will be notified when an outlet connection point with no registered facilities records an actual flow submission of greater than or equal to 10TJ for a given gas day.

Status
● Internal changes
● Minimal or no impact to Gas Market Participants
● Needs Gas Market Participants' attention. Potentially requires system or operational procedure changes.

# 3. Internal Improvements

Additional AEMO functionality has been introduced in relation to the monitoring and alerting application (MOSMI) used by AEMO's WA Market Operations Team regarding the data submission obligation reports in the GBB (WA). These changes ensure AEMO can effectively manage its obligations under the GSI Rules and monitor Gas Market Participant submission obligations.
