### Section 1 - General Comments on the Impact and Implementation Report

Topic	Please Provide Response Here
<p>Sections 1 to 8 of the IIR sets out <u><i>AEMOs critical examination of the proposal</i></u>.</p> <p>Does your organisation supports AEMO’s examination of the proposal?</p> <p>If no, please specify areas in which your organisation disputes AEMO examination proposal and include information that supports your organisation rational why you do not support AEMO examination.</p>	<p>Origin agrees with AEMO’s assessment in section 8 that implementing IN011/20 in isolation of the schema upgrade planned for the Life Support implementation, will be material.</p> <p>We therefore recommend this change is included with (IN003/20).</p>
<p>Section 9 and 10 of the IIR set out <u><i>AEMOs recommendation and timeframes</i></u>.</p> <p>Does your organisation supports AEMO position to recommend the procedures changes and the timeline for those procedures change to take effective?</p>	<p>The proposed timeline of Q4, 2021 is not recommended given all industry changes that are expected to be delivered in this quarter.</p> <p>Q4, 2021 places risk for industry and individual participants, with business and IT resource constraints to deliver on both electricity and gas changes.</p> <p>Q4, 2022 or later presents the least risk and optimal time to deliver the scale of change required as a bundled piece of work, particularly with new JEC’s likely to be added to the suite of work to be delivered.</p>

Section 2 - Feedback on the documentation changes described the Attachments of the IIR.
