Melbourne
VIC 3000
Australia**

Dear Sir/Madam

Submission in Response to AEMO Draft Report on Schedule 5.2 of the NER

This Submission is in response to AEMO's Draft Report dated 2023-03-03:
<https://aemo.com.au/consultations/current-and-closed-consultations/aemo-review-of-technical-requirements-for-connection>

I wish to draw AEMO's attention to a separate submission to AEMC in relation to clause **S5.2.5.9 Protection systems that impact on power system security.**

<https://www.aemc.gov.au/rule-changes/conditions-generator-protection-systems>

AEMC have not as yet initiated the formal Rule Change Request for the change to S5.2.5.9.

This submission is a simple relocation of one paragraph from the Automatic Access Standard to the Minimum Access Standard.

However, I believe it is an important correction and clarification for the industry at large, the NSPs and AEMO themselves of what analysis must be done in support of connection applications under the Minimum Access Standards.

In the event that you have further questions, please do not hesitate to contact me by email and or phone at your convenience.

Sincerely

**Rodney Hughes
Managing Director
