# CIP\_040: Customer Switching Proposed Date - CR1060 & CR1061

Meghan Bibby & Jackie Krizmanic (AEMO)

## Customer Switching – CATS Procedure – CR1060 & CR1061:

- Due to a schema constraint, the initiating FRMP must also provide a Proposed Change Date in the CRs.
- There are no specific requirements around what date should be applied in the Proposed Change Date as AEMO has established logic for these two CRs to replace the date with the date that should be applied to make the reversals work.
- CIP circulated on day of meeting

# Upcoming CIP: 5MS – MDFF Spec NEM12 NEM13 – 3.3.1 (b)

Meghan Bibby (AEMO) & Dino Ou (Endeavour)

- CIP\_025 (N Quality Flag) was recently consulted on as part of the Metering ICF Package 2020, but MDFF 3.3.1.b was not fully updated to reflect this.

MDFF v2.2 (change-marked, due 1 Oct 2021):

(b) Where no Interval values exist, the IntervalValue field must contain a value of zero (0) ~~and the QualityFlag field must have a value of "N"~~. A null value is not allowed in the quantity field of the NEM13 file.

MDFF v2.3 (proposed, to overwrite v2.2)

(b) Where no Interval values exist, the IntervalValue field ~~may~~ **must** contain a value of zero (0). A null value is not allowed in the quantity field of the NEM13 file.

- This aligns the Metrology Procedures around what a MDP should provide when they don't have meter reads. It should have been picked up in the AEMO 'N' Flag change request but unfortunately wasn't.
- CIP to be circulated shortly
